

RJ45 PREMIUM DATASWITCHES

Multiple computers share an RJ45 device, or vice versa. An affordable way to share any device with an RJ45 interface such as ISDN, hi-speed cable & DSL modem. It is fully-wired to support all RJ45 datacomm applications while the enhanced version supports Category 5 and is power free. These manual dataswitches have a shielded metal case to provide protection against electronic interference, and has a moisture proof mechanism. The heavy duty sealed rotary switch is guaranteed up to 10,000 switching cycles.

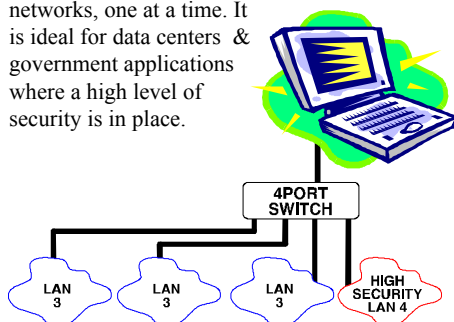

QVS SUREGRIP SERIES:

Our exclusive SureGrip line of dataswitches have suction cups instead of regular rubber feet to provide stability during switching and to prevent the switch from being pulled by connected cables.

THE SECURITY APPLICATION:

These switches can be used to connect one computer to two or four different local area networks, one at a time. It is ideal for data centers & government applications where a high level of security is in place.

Switches Designed for CAT5 Applications:

**2Port SureGrip CAT5 RJ45 Premium Switch
CA284E-2S**

Two PC's share one RJ45 device such as ISDN, hi-speed internet cable or DSL modem or vice versa. It has shielded CAT5 internal wiring, fully-wired to support all CA5 LAN applications and is guaranteed up to 10,000 switching cycles. It features SureGrip to provide stability during switching. (Connectors: 3 RJ45 Female)

**4Port SureGrip CAT5 RJ45 Premium Switch
CA284E-4S**

Four PC's share one RJ45 device such as ISDN, hi-speed internet cable or DSL modem or vice versa. It has shielded CAT5 internal wiring, fully-wired to support all CA5 LAN applications and is guaranteed up to 10,000 switching cycles. It features SureGrip to provide stability during switching. (Connectors: 5 RJ45 Female)

Switches Designed for RJ45 DataComm Applications:

**2Port SureGrip RJ45 Switch
CA284-2S**

Two PC's share one RJ45 device such as ISDN and modem, or vice versa. It is fully-wired to support all RJ45 datacomm applications and is guaranteed up to 10,000 switching cycles. It features SureGrip to provide stability during switching. (Connectors: 3 RJ45 Female)

**4Port SureGrip RJ45 Switch
CA284-4S**

Four PC's share one RJ45 device such as ISDN and modem, or vice versa. It is fully-wired to support all RJ45 datacomm applications and is guaranteed up to 10,000 switching cycles. It features SureGrip to provide stability during switching. (Connectors: 5 RJ45 Female)

QVS RJ45 PATCH CABLES:

- | | |
|----------------|--|
| CC711E | CAT5 Patch Cords
Stranded & Molded
Male to Male, RJ45
Length: 3" - 50" |
| CC712E | CAT5 Patch Cords
Stranded & Assembled
Male to Male, RJ45
Length: 3" - 100" |
| CC712EX | CAT5 Patch Cords
Crossover Type
Stranded & Assembled
Male to Male, RJ45
Length: 3" - 50" |

Note: CAT5 RJ45 switches supports bandwidth between 65 to 100MHz.
